Subject: RE: Emeraldene Poultry Farm - Environmental Application

Hi Frances,

Thanks again for keeping us informed. I have reused the attachments and respond as follows:

The application is a standard application which covers only the very basic concept of the application. Nothing extraordinary here.

The description again is in very broad terms. It is difficult to understand exactly where the property is because the locality map, said to be attached to the description document could not be found. I am assuming that it as an extension of the poultry farm on the left of the road to Zinkwazi just after coming off the highway.

Due to the format of the questionnaire document I was unable to fill it in. This is no major hassle because the issues will be:
Waste disposal, prevailing winds which affect smell and pests, traffic, carbon loading (smoke and power generation), water demand, power demand, sewage demand, diseases (poultry flu is a very topical issue).

I would want to have insight in the EIA and the EMP once available.

Good luck and best wishes.
