**SUBJECT: Auditing of Emeraldine Farm**

*This fax serves to confirm that Emeraldine Farm has been audited by officials of the National Department of Agriculture(Agricultural Product Inspection Services) under the Agricultural Products Standards Act 119 of 1990. From the inception of my visit, the management of this enterprise have continually improved on the quality management systems ensuring compliance within the regulatory parameters of the government legislation. Apart from evaluating the QMS systems, end product inspections were also carried out with regards to the internal and external quality of the eggs which were subjected to specific criteria as stipulated in the APS act.*

*I have been made aware that the management intends expanding the present operation and due to their track record, I would support such an initiative based on historical evidence. Should you require further clarity regarding the above matter, please do not hesitate to contact this office.*

**ASSISTANT DIRECTOR: KZN. Agricultural Product Inspection Services**
