**Subject:** RE: Poultry Farm Extension and effects on Zinkwazi

Thanks Frances.

Without knowing the exact proximity of the Poultry farm, I would nevertheless wish to place on record my concern about this proposal.

Does the mill represent a bulk feeding system? If so the new scale of operations could be considerable. I trust that this application is limited to poultry farming, and not slaughtering?

Will the traffic volume of heavy delivery vehicles carrying live birds, and leaving a trail of feathers on the access road also increase?

Please keep us in the loop on this worrying development.

Thanks again.

Malcolm Stewart

**Subject:** Fw: Poultry Farm Extension and effects on Zinkwazi

Hi everyone.

It has been brought to our attention that the poultry farm outside Zinkwazi has made application to extend their facility quite substantially and to erect a mill facility. The extension could have a major effect on the village as far as flies and bad odour.

We have obtain the advertisement that was placed in the Courier and have attached it for your perusal. We the Zinkwazi Ward Area Committee feel that an EIA public scoping meeting should be arranged in order to ascertain the effect this could have with regards the Zinkwazi Area.

Please feel free to forward objections to
