Subject: RE: Poultry Farm Extention and effects on Zinkwazi

Dear Frances,
Thank you for the notification received.

I have had first hand experience regarding poultry farms in the vicinity – having had one in Centurion as a "neighbour"

It took nearly 10 years to get it closed down and removed from the neighbourhood – after serious complaints and legal actions

The owners continuously promised steps to negate the negative aspects (ghastly smell, rodents by the millions, etc) but never produced on these promises.

If the wind blows your way – you've got the smell and there is nothing you can do about it.

We must fight this hook line and sinker

Regards

Jaap

Subject: Fw: Poultry Farm Extention and effects on Zinkwazi

Hi everyone.

It has been brought to our attention that the poultry farm outside Zinkwazi has made application to extend their facility quite substantially and to erect a mill facility. The extension could have a major effect on the village as far as flies and bad odour.

We have obtain the advertisement that was placed in the Courier and have attached it for your perusal. We the Zinkwazi Ward Area Committee feel that an EIA public scoping meeting should be arranged in order to ascertain the effect this could have with regards the Zinkwazi Area.

Please feel free to forward objections to
